Don't forget to block and watch your resistance Four Thirty-Three • Brajeta to the star pits you against the jobbers of clandestine fighting clubs, emerging pugilists and championship boxers. While your journey to the top of the boxing ladder starts simple enough, things soon get tough for you as your boxer faces more formidable opponents. If you are looking to succeed regularly, you will need to adopt a strategy that involves not being too predictable. • Change your Jabs, Hooks and Uppercuts delivery. Sometimes it's better to dance around your enemy, get acquainted with their tactics and let them swing first so you can incapacitate them with Counter Punches. Once your opponent is stunned, lie down to them with multiple uppercuts. And finally, activate your Hyper Skill while your opponent is in the middle of attacking. • Along with a good offense, you also need to adopt a strong defense. When a match starts to get a little difficult, it starts to block. This tactic not only defends incoming hits, but also it also helps your boxer regain some of his health. By the way, do you see that heart rate monitor under your health meter? That part of your boxer's user interface (user interface) represents its resiliency. Keep an eye on it and make sure it doesn't fall too low: once it reaches zero, your boxer will throw punches at an extremely slow pace. 2. Do some training, earn skill points, and develop a varied skill set Thirty-three • After participating in some training, your boxer will acquire the skill points needed to acquire different types of skills. The type of skills you can buy and upgrade are Jabs, Hooks, Uppercuts, Specials, and Stances. Once you purchase all the skill slots, you can choose to fill them with a varied skill set. For example, a varied set of moves means equipping Stunner Hunter Stance Rookie, Rib Crusher, Thorn Fist, and Rampant Rage. Or you can attach a matched color posture and special attack/skill to your boxer – this helps increase the stats of those abilities. • You've probably already noticed this, but each skill is linked to a different color alignment. Green Skills are linked to the Counter Master attribute. Purple Skills are linked to the Stun Hunter attribute. Blue Skills are linked to the Resistance Burner attribute, and Orange Skills are linked to the Lucky Striker attribute. • Counter Master's abilities give your boxer powerful counter hits, stun hunter skills help you deal more damage to dizzy opponents, Resistance Burner abilities increase your attack power when your boxer's stamina is high, and Lucky Puncher's abilities randomly increase your attack power. Green posture skills are strong against Orange, orange posture skills are strong against purple, purple posture skills are strong against blue posture skills, and blue posture skills are strong against Green. 3. Jump into the League! Four Thirty-Three • In addition to Story Mode battles, you'll be thrown into the ring during League matches. Winning these matches helps you acquire Star Points, which is intended to renew your training contract with Khari when you finish all your available training sessions. As you reach higher ranks within the current League you compete in, you'll receive a certain type of league rewards box.
